

EQUIPMENT RENTAL PROGRAM

No-till planting, liquid manure, and lime spreading equipment are available to rent to county farmers. Services provided with this equipment include delivery and set up, maintenance, and operating instructions. We also can provide soil and manure testing, pH testing, nutrient management planning, residue management recommendations, etc.

No-till Drills- Great Plains, John Deere, and Haybuster

Can be used to plant various hay crops such as alfalfa, timothy, orchard grass, brome grass, clovers, birdsfoot trefoil, reed canary grass, ryegrass, etc.

Other common uses include small grains, cover crops, pasture renovations, soybeans, warm season grasses, and other narrow row crops.
10 foot planting width with 7.5 inch row spacing

No- till Corn Planters- John Deere, model 1750

These are four row planters that are set up to plant 30" and 36" rows. No tillage is required to plant with these machines. Sorghum attachments are available as well as row cleaners, dry and liquid fertilizer bins, and insecticide boxes.

Multi-Purpose Liquid Pump

Manure Equipment will be sold in March of 2013

These pumps will work in lagoons and straight walled pits up to 16 feet deep.

Liquid Manure Tanks

Manure Equipment will be sold in March of 2013

These tanks hold 3350 gallons and are equipped with hydraulic brakes.
Farmers in the Cove Creek Watershed have access to a 4,300 gallon tank.

Damp Lime Spreaders

Can be used to spread lime and poultry litter. A 5 ton and three 8 ton capacity spreaders are available.
